

Rhode Island NOVELTY

Redemption Rundown: Redemption Training Series

Episode 2 – Supplying the Best Supplies

In this episode of our training series, Kassidy explains the crucial role of supplies in maintaining the organization, professionalism, and customer appeal of your redemption center. At Rhode Island Novelty, we are your one-stop shop for every supply you need, from bins for your counters to backwall supplies and more.

Our bins come in various sizes to accommodate the range of prizes offered in your redemption center. These versatile supplies are great on the walls or within your counters.

Another essential supply is scan hooks. These hooks can hold large quantities of products on each hook, and the ones we offer at Rhode Island Novelty make it effortless to display product ticket values. These hooks are designed at a length of 12 inches from the wall, perfectly suited for showcasing products throughout your center.

Our baskets also extend 12 inches from the wall. They are available in various sizes, making them suitable for all types of products, whether they are small or large. Our baskets have got you covered, regardless of the needs of your redemption center.

Lastly, shelves are a must-have supply. They are ideal for boxed items and for displaying light-up products, thanks to their easy access to wall outlets. Our shelves adhere to the 12-inch off-the-wall format, ensuring a cohesive and organized display in your center. Additionally, we offer mounting brackets for these shelves at Rhode Island Novelty. While these supplies are designed for slatwall use, we can provide various outside contacts if your center uses gridwall or another type of mounting wall.

Kassidy explores these details in today's video to ensure that your redemption center remains well-supplied with the best in the redemption business.

Check out our next video where Kassidy returns to talk about seasonal items and their critical role in redemption centers!
